

COURSE IN GENERAL SAFETY INDUCTION (CONSTRUCTION) 30215QLD

Course Aim

Participants will acquire knowledge of the following areas:

- Appropriate legislative requirements and responsibilities;
- Basic concepts of workplace health and safety plans and work method statements;
- Physical building and construction hazards;
- Basic risk management concepts including hazard identification, assessment of risk, control of risk and evaluation of control measures;
- The hierarchy of controls (eliminate, substitute, redesign, isolate, administrate and use of personal protective equipment);
- Emergency procedures.

Course Elements

- **GSIBC001.1** – Apply basic risk management concepts when working on a building and construction site.
- **GSIBC001.2** – Prepare for and use safe work practices when working on a building and construction site.
- **GSIB001.3** – Interpret and comply with relevant workplace health and safety obligations and Common Law when working on a building and construction site.

Course Assessment

Assessment methods shall include but are not restricted to:

- Written or oral short answer questions;
- Case study; and, Practical exercises.

The assessment will require competent demonstration of all the elements (GSIBC001 – GSIBC003) in this training course.
