

MNMG237A WORK SAFELY AT HEIGHTS

Course Aim

To provide the basic skills and knowledge of all procedures, requirements and instructions that underpin safe work at heights at the workplace. To implement appropriate procedures and techniques for efficient and effective working safely at heights.

Learning Outcomes

Participants will acquire knowledge of the following areas:

- Queensland Statute legislative requirements;
- Associated hazards with working at height and safe working procedures in accordance with AS/NZS 1891 series;
- Site specific hazards and methods for evaluation and control;
- Risk assessment and documentation of job safety analysis;
- Selection and inspection of materials, tools and equipment; including personal protective equipment;
- Working at height permit to work;
- Access and installation of working at height system;
- Rescue and emergency procedures.

Course Elements

- **MNMG237A.1** – Identify work requirements
- **MNMG237A.2** – Prepare for work
- **MNMG237A.3** – Access and install equipment
- **MNMG237A.4** – Perform work at heights
- **MNMG237A.5** – Clean up work area

Course Assessment

At the completion of each element session, a theory assessment will be conducted. The assessment will be 'closed' book. Due to the widely varying and different types of working at height operations, the trainer/assessor will develop their own practical assessment scenarios. These shall be based on the type of training facility, conditions, activities and hazards that can be 'generated' for the practical exercise.

Practical assessment will also include the following:

- Completion of risk assessment, job safety analysis, and working at height entry permit,
- Inspection and donning of fall protection equipment.
- Demonstration of correct selection and use of fall protection system

Qualification

Statement of Attainment in:

- *MNMG237A Work Safely at Heights*

Delivery Mode

Face-to-face teacher-centred learning.

Course Duration

8 hours (8:00am – 5:00pm).
