

## COURSE IN JOB SAFETY ANALYSIS

### Course Aim

The Job Safety Analysis course is designed to take trainees through the key processes involved in identifying hazards and analysing and assessing the risks that they may encounter at their workplace. The program provides trainees with the necessary skills to implement these concepts in the workplace.

### Course Elements

The Course covers the following elements:

1. Identify hazards
2. Assess risk and identify unacceptable risk
3. Identify, analyse and implement risk treatments
4. Complete records and reports

### Course Assessment

- Development of an individual job safety analysis.
- Written assessment.

### Qualification

Statement of Attainment in:

- *MNMG205A Conduct Local Risk Assessment*
